To improve the irrigation technology and Online volunteering provides guidance to famers

Smart farming systems reduce waste, improve productivity and enable management of a greater number of resources through remote sensing

AIM THINKS

IOT Based Smart crop
Irrigation System
for Agriculture

DOES FEELS

Irrigation techniques should be improved, Online volunteering provides guidance to farmers, Banks are giving less priority to farmers, most of the people reside in cities.

Improving irrigation Techniques help farmers, flood irrigation need more water drip irrigation is most expensive irrigation, banks are not providing proper financial help.
